---

Professional Summary

IT postgraduate student currently working as IT Support at Manufacturing Labour Hire Solutions Pty Ltd (MLHS), with previous experience in basic IT system setup and maintenance, telecommunications sales, administration and frontline customer service. Brings practical problem-solving, clear communication and accurate record-keeping. Interested in mobile application development, with academic experience building and testing hybrid applications and exploring AWS hosting architecture.

Technical Skills

Workplace Experience

- IT Support: Remote and in-person troubleshooting; endpoint and peripheral setup.
- Identity and Access: Active Directory user accounts and permissions.
- IT Service Management: ServiceNow incident and service-request management, prioritisation against service-level agreement (SLA) targets, escalation and knowledge-base documentation.
- Infrastructure Support: Cisco switch/router configuration assistance; System Center Configuration Manager (SCCM) and Windows Server Update Services (WSUS) deployment and patching support.

Academic and Personal Project Experience

- Application development: HTML, CSS, JavaScript, jQuery, Node.js, Express, MongoDB Atlas, Apache Cordova and Android application testing.
- Development and deployment tools: Docker, GitHub Actions, automated testing and Android build troubleshooting.
- AWS: Academic project experience with EC2, application load balancing and VPC networking.

Foundational Knowledge

- Operating systems: Linux command-line navigation and file-permission concepts; macOS settings, Terminal and mobile device management concepts.
- Windows administration: Group Policy and Event Viewer concepts.
- Cloud platforms: Microsoft Azure fundamentals and basic virtualisation concepts.
- Networking: TCP/IP, DNS, DHCP, Wi-Fi, VPN and firewall fundamentals.

- Cybersecurity: Multi-factor authentication (MFA), password policies, phishing identification, least privilege and malware detection and removal concepts.

Business Applications

- Microsoft Word, Excel and Outlook — working knowledge.

Professional Experience

IT Support | Manufacturing Labour Hire Solutions Pty Ltd (MLHS)
Epping, VIC | September 2026 – Present

Key Responsibilities and Contributions

- Provide first-line remote and in-person support for hardware, software, account access, and network connectivity issues.
- Set up and troubleshoot desktops, laptops, mobile devices, printers and scanners, and configure user accounts and access permissions through Active Directory.
- Log, prioritise and resolve ServiceNow requests within agreed SLA timeframes, escalating unresolved issues to the appropriate technical team.
- Assist with Cisco switch and router configuration and software deployment, updates and patching using SCCM and WSUS.
- Create troubleshooting guides and maintain knowledge-base articles documenting common issues, troubleshooting steps and resolutions.
- Provide end-user guidance on software applications and IT best practices, collaborating with colleagues to support day-to-day IT operations.

Front End Assistant | Costco
Ardeer, VIC | November 2025 – February 2026

- Assisted members with front-end enquiries and directed requests to the appropriate team.
- Supported checkout operations by assisting cashiers and packing members' purchases.
- Communicated with members and colleagues to support an organised checkout process.
- Maintained tidy front-end work areas and followed workplace safety procedures.
- Escalated member concerns or transaction queries to supervisors when required.

Food and Beverage Attendant | Gardiner Hotel
Malvern, VIC | November 2024 – July 2025

- Processed high-volume customer orders across food preparation and service duties.

- Operated registers and handled cash and EFTPOS transactions.
- Maintained hygiene standards while supporting customer satisfaction during busy service periods.

Team Member / Customer Service Assistant | The Holland Foundation
Melbourne, VIC | June 2024 – November 2024

- Managed a team of 6–8 in a customer service and retail environment.
- Monitored daily KPIs covering sales, customer satisfaction and safety.
- Trained new volunteers and reinforced adherence to OH&S policies.
- Processed cash and EFTPOS transactions and managed banking tasks.
- Maintained store displays, merchandising and security arrangements.

IT & Telecommunication Sales & Admin Support | JDC CO LTD
Savusavu, Fiji | 2009 – 2023

Key Responsibilities and Contributions

- Assisted with basic IT system setup and maintenance, using a ticketing system to log and track support requests.
- Supported customers by telephone and in person with telecommunications sales and service enquiries.
- Maintained operational records, completed data entry and reported daily key performance indicators.
- Used RF scanners to track products and update inventory records, supporting stock control and inventory accuracy.
- Provided front-desk administration and warehouse support within a team of 12.

Technical Projects

ShiftPay — Offline Mobile Pay Estimator | September 2026 – Present

Personal project | GitHub: dayaramyavik-GDs/shiftpay-app

- Developed and tested an offline Android pay-estimation app using HTML, CSS, JavaScript and Apache Cordova, with shift calculations and CSV/PDF exports.
- Used Docker and GitHub Actions to automate Android builds and signed releases; diagnosed JDK compatibility and missing build-tool issues.
- Wrote 24 unit tests, implemented input-validation safeguards and verified functionality on a physical Android device, reviewing and debugging AI-assisted code.

Assessment Tracker — Hybrid Mobile Application | August 2026 – Present

Independent project | GitHub: dayaramyavik-GDs/assessment-tracker

- Built an assessment and grade-planning app using JavaScript, Cordova, Node.js, Express and MongoDB Atlas, implementing password hashing, JWT authentication and input validation.
- Deployed the backend using Docker and Render; diagnosed and resolved CORS, connectivity, database configuration and Android build issues.
- Configured GitHub Actions for automated testing and security checks, wrote 48 API tests and tested the Android release on a physical device.

BookHaven — AWS Hosting Architecture | June 2026 – September 2026

University group project

- Contributed to an AWS hosting architecture incorporating application load balancing, private EC2 application servers and VPC networking.
- Prepared technical documentation and presentation material explaining the architecture.

Additional Projects

- Shadow Protocol: Built and tested an Android stealth-action game using HTML5 Canvas, JavaScript and Capacitor with AI coding assistance. Published web and Android releases through GitHub (https://github.com/dayaramyavik-GDs/shadow-protocol)

Education

Masters in Information Technology — Network and Information Security
Central Queensland University, Melbourne Campus | July 2025 – Present
Minor: Mobile Application Development

Post Graduate Diploma in Management
Glen Institution – March 2024

Bachelor of Arts in Information Systems with a Minor in Psychology
University of the South Pacific– March 2019

Certifications

- Google Project Management Certificate
- Meta Front-End Developer Certificate
- Workplace OH&S Awareness
- Customer Service Excellence Program – Holland Foundation
